Commissioner for Patents

Applicant's response, filed 10/21/2005, to the written restriction and election of species requirement, mailed 09/19/05 is acknowledge. Applicant's election of Group I, claims 1-8. in said response is acknowledge. Unfortunately applicant's response was both unclear and incomplete in regards to the election of species. Applicant's election of the substituted imidazole of Diagram 1, where R2 is a methylene-amino group as shown in Diagram 3 with R5 being a methyl group is acknowledged. The moiety election for the R6 group is totally confusing because applicant elected said R6 group to be a "methylene-methylene-amino" group, (what is this?) with one of the substituents being hydrogen and the other a methyl group, "i.e. CH<sub>2</sub>-NH-CH<sub>3</sub>" (this is not a methyl group!) Furthermore, the election of species was incomplete because applicant failed to elect a specific moiety for each of the R1, R3 and R4 groups on the elected Diagram 1 generic structure. Applicant is given 1 month from the mailing date of this office action to correct these problems.
